Section 7: Checklist of Required Information

- A copy of a valid Certified Food Protection Manager Certificate
- A product label for each product category selected in Section 2, demonstrating that you are complying correctly with labeling regulations

- If producing acidified or fermented foods (pickles, kraut, kimchi, etc.), one of the following:

A. A completed food safety plan and representative pH Test for each product with a different food safety process

Example: Delia makes pickled cucumbers, pickled beets, kimchi, and hot sauces. Each of these four products requires a different process to make. She will need to submit a food safety plan and pH test for all four products.

Example: Janae makes a pickled cucumber recipe that has five different variations (one with dill, one with jalapenos, one with more sugar, one with stevia, and one with ginger). Although the recipes vary slightly, the pickling process is the same for all five recipes. A pH test and food safety plan is not required for each of the five recipe variations.

If producing canned tomatoes or canned tomato products (i.e. salsa, pasta sauce, etc.) one of the following:
